RENDER 1 ALL PURPOSE RENDER

ONE RENDER FOR ALL APPLICATIONS

Ideal for: BLUEBOARD, CEMENT SHEET, MASONRY, BRICK, CONCRETE PANELS, LIGHT WEIGHT BLOCKS & POLYSTYRENE.

Can also be used as a Joint Filler for Blueboard.

Australian Builders All Purpose Render 1 is an easy to apply PRE-MIXED dry cement based, premium quality acrylic render finish.

AT LAST! there's one easy solution to all your interior & exterior rendering projects.

Australian Builders Render 1 is easy to mix, easy to apply and easy to clean up using water.

Australian Builders Render 1 is ideal for use on new surfaces or rejuvenating existing surfaces, giving them added strength, durability and long term resistance to weathering.

Usage: Can be used on most substrates even painted surfaces. Can also be used as a flexible joint filler when used with mesh tape on the joints. (Note: renders are a coating and should not be used as a structural product).

Quick Surface Finishing: The finishing layer of render (trowelling etc) can be applied 1.5 to 4 hours after the first layer, depending on the type of surface and the atmospheric conditions. To obtain a smooth and compact exterior finish a plastic or styrene float is recommended. It can be further textured "sand like finish" with a sponge float, prior to painting. Interior surfaces can be finished when the render is completely hardened, by applying finishing plaster, smoothing products or mineral based wall coatings.

For spectacular decorator effects add a touch of colour by adding Australian Builders Acrylic Colour Oxide. There's a huge colour selection to choose from.
